TECHNICAL INFORMATION CTL 014 / 2016- CLI

1. INTRODUCTION

Lamiecco Technological Center Lamiecco- CTL, has performed the test on the WHITE LAMIECCO material abrasion.

2- DESCRIPTION OF MATERIAL

The materials analyzed have THERMOLAMINATION APPLICATION

3. EMPLOYEE TEST PROCEDURE

The abrasion test was carried out based on the Annex G of ABNT NBR 15761- Wood furniture: Requirements and test methods for decorative laminates. This method measures the resistance to wear decorative laminates applied on a substrate with the aid of a abrasive device.

4- TEST RESULTS

The sample was tested on these parameters, and the test end mass. It was measured in an analytical balance with three decimal places of precision (0,000g) not detected the mass loss in the sample; it has been so approved by the standard. (See ANNEX , Figure 01)

5- CONCLUSION

The material is suitable for covering purposes, and rated above the norm.
